- JAVA
- SQL
- MS OFFICE
- HTML
- CSS
- JAVASCRIPT
- AUTOMATION TESTING
- MANUAL TESTING

### PROJECTS

#### A Secured RTO System for Automobiles

2015-2016

RTO web application acts as an interface to oversee transport paperwork such as pollution tests, registration cards, insurance copies, and driving licenses. The web applications consist of a system where users or drivers register themselves by entering their credentials and uploading their vehicle details which as a result generates a unique id. Traffic police can log in to the system and monitor all the user's information. They can also impose a fine when a user is found violating the state traffic policies for instance if a driver is not carrying valid DL documents with them and it can also be further utilized as a means to catch criminals.

### EXPERIENCE

#### Data Entry and Loan Verifications

July 2018 – June 2019

- ✓ We used an application BFSD (BAJAJ FINSERV SECURED DIRECT) portal it's fully banking type employers and customers easy to handle.
